Response to Amendment

1. Newly submitted claims 84-88 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claims 84-88 provide for control of signaling between two telephone interfaces, classified in class 379, subclasses 156+, 242+, 399.01+ and 418; whereas, original claims 1-43 provided for forwarding on ring-no-answer for a telephone connection over a packet network, classified in class 370, subclasses 252+. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 84-88 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Allowable Subject Matter

2. Claims 44-83 are allowed.
